Professional Summary

C#/.NET Developer with 3+ years of experience delivering ASP.NET Core Web APIs and SQL Server-backed applications on Azure App Service. Skilled in .NET 7/8/9, EF Core, object-oriented design, dependency injection, and xUnit API integration testing. Experienced in production troubleshooting, legacy system modernization, and SQL/Python automation.

Technical Skills

Languages: C#, SQL, T-SQL, Python, JavaScript, HTML, CSS
Backend & Frameworks: .NET 7/8/9, ASP.NET Core Web API, MVC Controllers, Blazor Server, REST APIs, EF Core, LINQ, async/await
Database & Cloud: SQL Server, stored procedures, SQL indexes, SQL automation, Azure App Service, SSRS, Power BI
Testing & Practices: xUnit integration testing, OOP, interfaces, polymorphism, dependency injection, Git, pull requests, JWT, OAuth 2.0, Postman, OpenAI Codex, Claude Code

Experience

Sunrise Plastic Enterprise Inc. Jul. 2023 – Present
Software Developer *Houston, TX*

Warehouse Inventory API | *C#, ASP.NET Core Web API, EF Core, SQL Server, Azure App Service*

- Developed and deployed ASP.NET Core Web APIs on Azure App Service with SQL Server integration for warehouse inventory and plant receiving, improving data-processing speed by 35%.
- Built reusable C# services using interfaces, OOP, and dependency injection; implemented EF Core/LINQ data access with async queries and multiple DbContexts, reducing manual processing by 85%.
- Designed controller-based ASP.NET Core APIs and wrote xUnit integration tests validating GET responses and POST data persistence against SQL Server test data.
- Resolved production API failures and incomplete sync by tracing logs and fixing pagination and field mappings; used Codex and Claude Code to assist debugging and reviewed changes before release.

Internal Purchase Order System | *C#, .NET, Blazor Server, SQL Server*

- Developed and maintained a Blazor Server purchase order application with SQL Server, separating UI components from business and data-access logic.
- Migrated legacy Visual Basic business logic into reusable C#/.NET features and data-access APIs; managed changes with Git and pull requests.

Plant Receiving Reporting Automation | *SQL Server, T-SQL, Stored Procedures, SSRS*

- Developed SQL Server stored procedures, table indexes, and SSRS reports for plant receiving and warehouse operations.
- Automated scheduled reporting with T-SQL, reducing manual report preparation effort by 85%.

Fleet Reporting Automation | *Python, Pandas, Samsara REST API*

- Automated mileage and fuel reports using Python, Pandas, and the Samsara REST API; used JWT and OAuth 2.0 for third-party API authentication and generated Excel reports.

Projects

Real-Time Data Pipeline | *Python, Snowflake, GCP, SQL, CDC*

- Built a portfolio pipeline using Bronze/Silver/Gold layers to process 10,000+ daily transaction records from Google Cloud Storage into Snowflake.
- Used Snowpipe, Pub/Sub, Streams, and Tasks for sub-minute ingestion and incremental CDC; estimated 40% lower compute usage than full refreshes.

Education

Texas A&M University College Station, TX
Master of Computer Science *Aug. 2021 – May 2023*

National Central University Taoyuan, Taiwan
B.S. in Computer Science and Information Engineering *Sep. 2017 – June 2021*
