Professional Summary

Technical Account Manager with 3+ years of experience delivering API/ERP integrations, customer onboarding, and production support. Own technical relationships from discovery and onboarding through issue resolution and customer validation. Combine C#/.NET, SQL, and Python with clear stakeholder communication and workflow automation.

Technical Skills

Account Management: account ownership, requirements discovery, proofs of concept, onboarding, user training, stakeholder communication, user acceptance testing (UAT)
API Integrations: REST APIs, webhooks, HTTP, JSON/XML, OAuth, JWT, SSO troubleshooting, Postman, ERP integrations, data mapping
Support & Delivery: Jira, SLA-based ticket handling, Datadog log analysis, root-cause analysis, escalation, Agile, xUnit, Git
Development & Data: C#, .NET, SQL Server, T-SQL, Python/Pandas, Azure App Service, Windows/Linux, Power BI, SSRS, Excel, OpenAI Codex, Claude Code

Experience

Sunrise Plastic Enterprise Inc. Jul. 2023 – Present
Technical Account Manager *Remote*

Customer Account Ownership & Implementation
- Own technical relationships with three external customer accounts across different SaaS platforms; gather requirements, develop proofs of concept, and support users across five departments.
- Lead end-to-end onboarding and training for approximately 10 users monthly; support two application rollouts per month and validate readiness and outcomes with business teams.
- Configure environment variables, database connection strings, and API authentication for customer-specific Windows/Linux deployments; validate settings before production rollout.
- Participate in Agile backlog prioritization, sprint planning, daily stand-ups, and retrospectives; incorporate customer feedback into development priorities and share progress and blockers.

Technical Support, Incident Resolution & Quality
- Own approximately 15 ERP/API tickets monthly in Jira, following SLA requirements and averaging 1–2 days to resolution; communicate progress, escalations, and next steps through customer-validated closure.
- Resolved missing shipments after API submission by investigating Datadog logs and comparing source/destination payloads; fixed field and format mismatches, tested multiple cases, and confirmed recovery with clients.
- Established a triage, reproduction, root-cause analysis, and escalation workflow; analyze recurring issues by frequency and priority to guide fixes, reducing recurrence by 22%.
- Test null values, duplicates, invalid formats, and field mappings; document defects and write xUnit integration tests for GET responses and POST data persistence.

API Solutions, Customer Enablement & Automation
- Build REST API and webhook integrations connecting third-party services to ERP systems; developed ASP.NET Core/SQL Server inventory APIs on Azure, improving data-processing speed by 35%.
- Create and maintain API guides and FAQs covering API keys, authentication, payload schemas, and Postman demonstrations to help users configure and troubleshoot integrations.
- Built a reusable Codex/Claude workflow with Markdown instructions, SQL schema checks, and GET/POST code generation; manually validated results and tested releases, reducing development time by 36%.
- Replaced manual Excel entry and report preparation with SQL data retrieval and automated C#/T-SQL reporting, reducing preparation effort by 85%.

Education

Texas A&M University College Station, TX
Master of Computer Science *Aug. 2021 – May 2023*
National Central University Taoyuan, Taiwan
B.S. in Computer Science and Information Engineering *Sep. 2017 – June 2021*
